

# Case Presentation – Cardiology

Dr #####

Royal Infirmary

# Template for case presentation

The interaction will be set up by the College; we ask only that you provide the content, questions, data and images as a text document or slide show. We can also host video clips of any size.

The following suggests some of the components needed for your case presentation. It may not be appropriate to include all of these or the order may need to be changed, depending on the case.

Use this template as a guide and please provide images (consented clinical photos, test results) wherever possible. Please add questions for the reader, explanations of the correct answers, and perhaps things to think about for wrong answers.

# Consent

**IMPORTANT: These cases will relate to real patients. It is important that you seek consent from the patient for use in medical education. Consent forms can be downloaded from the cases page.**

# Background

Provide some background information if you like, putting the case in context.

# Case

Present the clinical scenario

Add photo(s) or video if available – remember to seek consent

# Examination / History

Details of examination / history

Ask some question about what this history suggests / what to do next?

-Answer 1

-Answer 2

-Answer 3

# NEW Question Types

Ask some question about what this history suggests / what to do next?

- Multiple Choice Question (MCQ) best of five
- Short answer (match keyword)
- Numerical
- Match list item to statement
- Image drag and drop markers

# Feedback on answer N

Provide answers and explanation

Link to other questions or do we present this in a linear format?

# Further investigations / diagnosis

Add more investigations if needed

Pose diagnosis / differential diagnosis questions

# Treatment / management

Ask about treatment and/or management

More questions

# Feedback to Treatment/Management

Answers / explain previous questions

# Outcome

Give information about outcome in this particular case, highlight peculiarities if need be or emphasize key decisions

# Educational information about the case

Provide any additional background or learning points for the case

# Self-assessment

You can utilise the following question types to present questions for the reader to test learning:

- Multiple Choice Question (MCQ) best of five
- Short answer (match keyword)
- Numerical
- Match list item to statement
- Image drag and drop markers
